I don't want to see it go. It's going to be a huge impact with the city. When I first went out there, it was supposed to be rural. This will just bring an influx with things that shouldn't be like crime and such and traffic. Also, I don't know where their going to get the water from. We're in a drought now. They can't get it from the air. I know one fellow I talked to who built buildings across the country. He said, if you need water, look for a lake. Said they were going to try and get it from Lake Tahoe. I told him the folks up there would never go for that.
